It has been a very busy term for the Year Two's!

We are really enjoying our maths and literacy rotations! In maths we have been working together with different activities that help us learn how to compare and order the mass, weight, volume and capacity of different objects. We are getting so quick with our Place Value, we can even do numbers into the 10 thousands! Our favourite part of maths has to be Friday Fun Day Maths Games. We get to go around the class and work on any of the games we loved in our rotations. Some of these are Snakes and Ladders Addition and Subtraction, Bean Bag Throw, How Many are Missing and lots more!

In literacy, we are learning about making important text-to-self, text-to-text and text-to-world connections with the books we are reading. We know that it's important to be able to retell the events in stories and how to use descriptive language to help with visualisations of characters and settings.
Science is always exciting. We are learning about wastewater and where it goes after we shower, wash & flush! We have also learned about where it comes from and the difference between city and country towns. We know about its cycle and we’re learning the correct terms such as water treatment plants, sewage treatment plant, bacteria and organic waste. We have also learned that anything with oxygen inside it will float; this was a fun experiment!
Investigations are definitely one of our favourite parts about school! The Vet Clinic is a very popular place to be, we have different roles such as the vet, vet assistant, receptionist, patients and pet shop assistant. We even had a real Vet come in to our classroom and examined Ned the Golden Retriever. In construction we work together to build and design some amazing models, we use our measuring skills to find out how long and wide these are. There have been some wonderful creations made in the collage and tinkering areas too.

We are always very busy in Year Two. There is so much to learn everyday and many different ways to learn it. We are working hard as a team to get our class DoJo points up and will hopefully get to have our pyjama day with popcorn and a movie in the last week of term!
